

Fact Sheet

HP Pavilion f1903 LCD Flat Panel Monitor

A Large Screen Viewing Experience

Overview

Perfect for viewing everything from digital photos and videos to video games in crisp, brilliant color and clarity, the competitively priced HP Pavilion f1903 LCD Flat Panel 19-inch monitor is an ideal companion to any HP Pavilion or HP Media Center desktop PC. With a large viewing screen, unmatched flexibility and multimedia friendly features, the HP Pavilion f1903 can make any home office feel like a home theater.

The f1903 features outstanding performance with:

- Native 1,280 x 1,024 (SXGA) resolution and a contrast ratio of 500:1, providing bright, crisp images
- Superior scaling making the f1903 monitor suitable for photo or video editing and gaming
- Standard 15-pin D-sub analog and advanced DVI-I digital interfaces, for compatibility with the latest digital graphics
- One of the thinnest bezel edges in the industry
- An advanced swivel feature allowing the display to turn 90-degrees to create a panoramic view for advanced applications
- A detachable base and slim, lightweight profile, making the flat panel easy to mount and move to different locations in the home
- Height adjustment so consumers can find the most comfortable viewing position
- Two standard Harman Kardon speakers

Price/Availability

The HP Pavilion f1903 LCD Flat Panel monitor is planned to be available at retailers or online at hpshopping.com starting Oct. 12 and will have an estimated street price of \$699 (after \$50 mail-in rebate).
